

Date Of Accreditation	October 19, 2022
Customer/Company Name	NMI Self 4000

Direct Submission	N	Bureau Type Approval	Y
-------------------	---	----------------------	---

Customer/Company Signature

The accreditation contained within this summary is specific to the system configuration set out in this document and only relates to the connection to services provided by Global Payments.

You shall not represent or state to any third party that use of a similar system configuration will automatically entitle that third party to authorise card transactions using this system configuration with Global Payments or anyone else.

You must not use the Global Payments name in any dealings you have with third parties or any advertisement without our prior written approval.

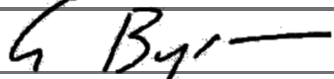

In giving this accreditation for this system configuration Global Payments does not accept any liability for loss or damage arising from use of the system. It is your responsibility to ensure the system conforms to Card Scheme Regulations and Requirements and that all necessary hardware/software procedures are in place.

Global Payments reserves the right to make changes to the destination IP addresses and requires you to test and migrate within the notice period provided.

NB: This accreditation is only valid whilst the certificates detailed below are in date. On expiry, new certificates will need to be provided. Renewal of certificates will be accepted unless fundamental components have altered eg: Kernel change. In such cases, a new accreditation will need to be undertaken.

To comply with industry standards, Global Payments only uses the latest security methods and we are removing our older certificates and protocols, including SHA-1 Certification and SSL3.0 protocol from our environment. Going forward we will only support SHA-2 certificates and the TLS 1.2 protocol.

Please sign below and return this form to us by way of acceptance of the terms and conditions herein.
